

2009 STUDENT SUMMER CAMP

YOUNG NATURALIST ADVENTURES

MIDDLE SCHOOL STUDENTS FROM 4TH TO 7TH GRADES

MATH AND SCIENCE IN NATURE

This summer come join us for an active exploration into nature in Montana. Students will explore math and science in nature. This hands-on camp is designed for students entering grades 4th to 5th (session 1) or 6th and 7th (session 2). The camp runs for 4 days and 3 nights from Monday at 9:00 am until Thursday at 11 am. Session 1 for 4th and 5th grade students runs from July 20th to 23rd 2009 and session 2 for students in grades 6th & 7th will run from July 27th to July 30th 2009.

The camp will introduce concepts from earth science and biology in western prairie and water habitats.

The camp is full of hands-on learning, featuring active hikes, outdoor recreation and games, problem solving, swimming, and canoeing. Students may as well leave I-pods, phones, and the electronic distractions of life behind. They will be forging new friendships and building communications skills with some amazing students from across the state of Montana.

For this camp we are seeking students who exhibit a strong interest in mathematics and science. The camp is designed for all students but will extend their thinking and improve their sense of what it means to be a scientist. Emphasis on reasoning, inquiry and problems solving skills will be stressed. Parents should be prepared to deliver students to the Montana Learning Center at Canyon Ferry Lake by 9:00 am Monday and attend a special closing presentation at 10 am on Thursday. Students attending this overnight learning experience should be prepared for active recreation and hands-on learning.

Teachers of Grades 4th to 7th are encouraged to Nominate Students
EACH CAMP IS LIMITED TO 16 STUDENTS (8 GIRLS AND 8 BOYS).
